Yehuda Fences is the largest producer of fences in Israel, leading the local fencing market in terms of the number of projects and their size, the quantity of fences with approved standard and the quality of work.

Part of the Yehuda Group

Yehuda Fences is a part of the Yehuda Group, a steel processing company since 1937 and a steel producer since 1995. The Yehuda Group is owned by the South African based steel producer "Cape Gate". The Yehuda Group includes steel producer Yehuda Steel Ltd. and steel processing welded mesh manufacturer Yehuda Welded Mesh Ltd. and fences producer and installer Yehuda fences Ltd. Yehuda Group includes ten industrial plants: The recycling plant – preparing ferrous scrap for recycling, the meltshop – scrap melting and casting billets, two rolling mills, and three cut and bend plants, a plant for welded mesh production and a galvanized wire plant, with most of its outcome exported world wide.

Israel's Welded Mesh Fences Pioneer

Yehuda Fences was the first to introduce welded mesh fences in Israel. Since 1985 the company began manufacturing mesh fences in an industrial plant. Since then Yehuda fences became a standard

in every kind of fences and replaced most of the chain link fences and other kinds of fences commonly used in Israel. The company installed thousands of kilometers of fences for security, safety, decorative and sport facilities in Israel and the world over. Other than fences, Yehuda Fences manufactures gates, steel barriers and many types of railings.

Highly Experienced Teams

Since its establishment in 1985 the company installed top quality security projects in Israel and around the world – perimeter fencing for Israel's main airport, IDF military camps and other security facilities, atomic power stations in the U.S and Canada, fencing of electric power stations in El Salvador and Turkmenistan, in the U.K and many more.

Products' Quality Standards

Yehuda Mesh fences are manufactured according to IS 4466 and 4273. In addition, all Yehuda fences are produced according to IS safety standards 1142 and 2142 part 1. All Yehuda fences go through hot deep galvanization in accordance with IS 918 and when required – UV resistant color by GSB German Standard. Yehuda operates subject to the international ISO quality standard 9000:2001.

Yfence Electronic Systems

Yehuda Fences installs security fence systems including sensor systems, command and control centers, cameras and CCTV. Yehuda Fences installation includes pre-installation planning and post installation service. In electronic perimeter security projects Yehuda Fences employs fully skilled and experienced teams. The company's project managers in this field are well learned and can assist in selecting the best system for the task.
