AudioCodes Ltd. designs, manufactures and sells advanced Voice over IP and converged VoIP and Data networking products and applications to Service Providers and Enterprises.

Products
AudioCodes is a market leader with over 17 years of product development experience, focused on VoIP network products and technology. During this time, AudioCodes has deployed tens of millions of media gateway and media server channels in over 100 countries. AudioCodes is a VoIP technology leader focused on voice quality and best-of-breed VoIP network elements with a proven track record in product and network interoperability with industry leaders in the Service Provider and Enterprise space.

AudioCodes' scalable & feature-rich converged Voice and Data network products enable Service Providers, Enterprises, Network Equipment Providers and System Integrators to build and deploy cutting-edge VoIP and converged Voice and Data solutions.

This product group includes Customer Premises Equipment (CPE), such as Media Gateways and Multi-Service Business Gateways for business communications, Enterprise Session Border Controllers, HD-enabled IP Phones, Residential Gateways and Media Servers. Additionally, Value Added Application software platforms are included in the AudioCodes product portfolio.

With an increasing number of vendors desiring to offer IP-based solutions to their customers, AudioCodes' field-proven enabling technology products allow OEMs to migrate smoothly and rapidly to a new voice infrastructure. Ranging from low to high-density award-winning products, this group is comprised of Voice over Packet (chip) processors, as well as PCI and cPCI telephony blades and call logging and call recording blades.

Ownership

AudioCodes is a public company. The company's shares are traded on the NASDAQ (symbol: AUDC) and the Tel Aviv Stock Exchange (TASE).
