

Brand Industries Ltd.

Line of Business

Metal & Industrial Equipment

Leading Executives

Mr. Gilead Halevy
Brand's Chairman of the
Board and General Partner
at KCPS

Mr. Chaim Brand
CEO and Director

Mr. Elisha Penker
CFO

Mr. Erez Cohen
Vice President
Marketing & Sales

Mr. Israel Brand
Production Manager

Mr. Amir Brand
Quality Assurance Manager

Brand is leading international steel fabricator employing the most advanced means and capabilities in the field of detailed engineering and large scale metal fabrications. Brand is involved in the production and assembly of large-scale steel projects, for the energy, chemical, infrastructures, and construction industries, particularly in the field of Power Plant projects.

Financial Data

Brand is a public limited Company whose shares are traded on the Tel Aviv stock Exchange and it enjoys a solid financial base.

Engineering

Brand's Engineering Dept. uses the most advanced technologies to produce detailed designs and load nodes calculations, including Stru-Cud software and designated software developed by the company's engineers. These facilities, together with complementary software such as AutoCAD and Steel Detailer, enable the company to supply accurate detailed design for the project – from 3D simulations of all the steel members, down to smallest details and structural members. This top quality engineering has earned Brand's award winning Engineering Dept. a prestigious worldwide reputation.

Production

The company's Plant is situated in the industrial zone of Yeruham, Israel on a 50,000 sq.m. Plot of land which includes 12,000 sq.m. Fabrication halls. Brand utilizes the most modern and advanced capabilities for steel fabrication, including CNC systems and machinery for drilling, punching, bending, rolling, cutting and more.

Quality Management System

Brand upholds the strictest of standards and complies with the ISO 9001:2008. Brand is certified for the manufacture and assembly of Pressure Vessels as per ASME U&S Stamp. DIN 18800-7 Class E for structural Steel., EN ISO 3834-2 Welding work shop certified in the product range of HRSG Non pressure parts, Pressure vessels, storage tanks, steel structures, gas piping.

Products

- HRSG elements and other steel elements for combined cycle power plants, including boiler

casing (with insulation), stacks, ducting, piping etc' for various leading international clients.

- FGD – Flue Gas Desulphurization System.
- Multipurpose storage tanks, pressure vessels, refinery towers for the oil and gas industry.
- Multi-Storied buildings, high rises, major infrastructure buildings.
- Equipment systems for the chemical, petrochemical, energy and concrete industries.
- High Voltage Transmission Towers of various types.
- Bridges @ Gantry's

Clients

Brand's list of customers extends worldwide from the Middle East to Europe, North America, the Far East and Australia. Constant contact with the front line of the world's metal industry created in the company a permanent process of assimilation of the world's technological innovations, making them a part of it at all levels of planning and implementation.
