

CGW - Camel Grinding Wheels, Ltd.

Line of Business
Abrasives

Established
1956

Leading Executive
Mr. David Drori
International Marketing
Manager

Camel Grinding Wheels manufactures a wide range of bonded and coated abrasive products. Established in 1956, the company is one of the pioneers of Israeli industry and is today recognized and respected throughout the world. CGW is leading in the aerospace, gas turbines and rail industries.

Production & Applications

Annual production currently amounts to over 3,000 tons of resin and vitrified bonded abrasive wheels. CGW grinding wheels are used through-

and Asia. In the U.S.A. the company's subsidiary, CGW-USA, maintains a 80,000 sq.ft. warehouse from where the company ships the products throughout North America. The company runs its own distribution in Israel covering the entire country through its chain of sales people.

ISO Certification

All production is based on advanced technologies, while complying with EN 12413 and OSA standards, and has ISO 9002 certification.

- Automated equipment assures consistent product quality and cost effectiveness
- Technical field support
- 100% performance guaranteed.

Overseas Markets

Australia, Bolivia, Canada, China, Chile, Colombia, Costa Rica, Czech Republic, Denmark, Ecuador, El Salvador, Estonia, Finland, France, Germany, Greece, Guatemala, Hungary, India, Ireland, Italy, Jordan, Netherlands, New Zealand, Norway, Philippines, Portugal, Singapore, South Africa, South Korea, Spain, Taiwan, United Kingdom, United States, Uruguay, Venezuela.

CGW Vision

CGW is looking for agents and distributors in Latin America, Asia and Africa in order to supply not only excellent service and abrasives products, but to offer complete solution to the companies which need to improve their work with cutting and grinding machines.

out the world for surface, centerless, cylindrical grinding, flute grinding, portable grinding, foundry snagging, creep feed grinding, cut-off (both reinforced and non-reinforced). CGW produces a wide range of vitrified (ceramic bond) and resinoid (organic bond) wheels for use in the metal industry, construction, welding, railway, gas turbine, aerospace, automotive, gear industry and other industries.

Global Marketing

CGW markets its products worldwide, in North America, Europe, Latin America, South Africa
