### **Leading Feminine Intimate Wash Line**

The Research and Development Laboratories of the CTS pharmaceutical company have developed FEMINA – a product line for the ultimate intimate feminine hygiene.

The Femina Line of liquid soaps for intimate external vaginal cleansing are specially formulated to contain lactic acid to encourage the natural vaginal acidity, and Tea Tree oil one of nature's essential oils, with natural mild antiseptic properties, to promote the body's natural microbial balance.

### **The line features:**

- 4 types of specially formulated external vaginal cleaning soaps
- Soothing application gel to help gently soothe irritated external vaginal areas
- Lubricating gel for vaginal dryness
- Intimate wipes

Femina promotes the delicate natural balance of the intimate area.

### **International Markets**

CTS have established a strategic network of international alliances with local companies and is exporting a wide range of its products worldwide.

CTS is focused on steady growth and has succeeded in achieving an increased presence in principle markets such as Europe, CEE, north and South America, Far East, Japan and other developed markets.

### **The Highest International Standards**

All CTS products are manufactured according to the highest international standards:

- **Quality Assurance:** meets all international Regulatory Authorizations
- **Pharmaceutical Manufacturing Facility:** ISO 9001:2000, Israel GMP certification, Romanian GMP certification, TGA (Australian Health Authority certification), PICs Certification (equivalent to GMP and valid in 24 countries including UK, Germany, France, Canada, Australia)
- **Cosmetics Manufacturing Facility:** ISO 9001:2000; Certification from the Israel Ministry of Health
