Over the last 30 years D.S Ltd has become one of the important support suppliers to the main automotive companies in the USA & Europe, to deal with Starters & Alternators.

D.S Ltd specialized in remanufactures Starters & Alternators as well new components for the private & commercial European vehicles & engines.

D.S Ltd. History

D.S Ltd founded in 1982 by Mr. Zuck Shuky and his wife Mrs. Diana Zuck, and join by there son Ziki Zuck in 1993 as sales & production manager. D.S Ltd has two factories located in Peatch-Tikva (HQ) and Or-Akiva in the north of Israel.

Technical Procedure for Rebuilding Alternators & Starters

Units are completely dismantled and all wear components are discarded, each part is thoroughly cleaned. Regulators, brushes bearings and drive assemblies are replaced with new components and units rebuilt.

All components are mechanically and /or electrically tested.

The rebuilt Alternators & Starters are tested for 100% under load to very high specifications and quality control.
