MAG USA Inc.

Mr. Jonathan Smith
jsmith@magusainc.com

The E.H.I Group, owned by Kibbutz Ein Hashofet, consists of three companies, all associated with the production of metal parts. Complete services from design, engineering, production, assembly and distribution to customer locations are offered to a variety of OEM and Tier-1 Companies in Europe and North America.

Mivrag Cold Forming Technology Ltd.

Mivrag is a world-class supplier of customer tailored cold-formed parts. A wide range of

Eltam's Metal Division specializes in sheet metal products. The stamped parts are coated as per the customers requirements and may be further assembled by specific automatic assembly machines.

Eltam is a long standing supplier of customers such as VW, Johnson Controls, Faurecia and MAG. Eltam complies with international quality standards such as ISO 9001, ISO/TS 16949 and ISO 14001.

MAG USA Inc.

The youngest member of the E.H.I Group is MAG-USA. This company, located in Clinton, Tennessee, focuses on the design, development and manufacture of mechanical and electro-mechanical assemblies for the automotive industry.

MAG USA is currently a market leader in the development and manufacture of a patented Spare Tire Hoist Carrier. This is just one of a number of products supplied JIT to OEM plants in North America.

Founded in 2001, MAG-USA is proud of its outstanding quality

material options including carbon steel, copper alloys and stainless steel are available. Following the cold-forming process, secondary operations such as tapping, drilling, lathing and grinding are performed as per our customers needs.

Heat treatments, plating and e-coating are all performed in-house.

Mivrag is ISO/TS 16949 and ISO 14001 certified. In 2002, Mivrag was awarded Supplier of the Year by Delphi Automotive. Mivrag also received Delphi's Pinnacle Award for outstanding performance during the years 2005 through 2008.

Eltam Ein Hashofet

Eltam's primary business activity is the development and production of magnetic and electronic ballasts, transformers and igniters for indoor and outdoor lighting systems.

Throughout the years, Eltam developed energy-saving systems for agricultural applications as well and Intelligent Lighting Systems for armored vehicles.

record. Quality Certifications include ISO 9001, ISO 14001 and ISO/TS 16949.

Seeking:

- Contracts to develop and supply components and mechanical systems in large volumes to the automotive industry.
- Cooperation and/or Joint Venture with Global Organizations for the design and manufacture of systems for the automotive market.
