

# E.R.M. Electronic Systems Ltd.

## Line of Business

Automotive tracking and anti theft solutions

## Established

1985

## Leading Executive

Mr. Meir Hayman  
CEO

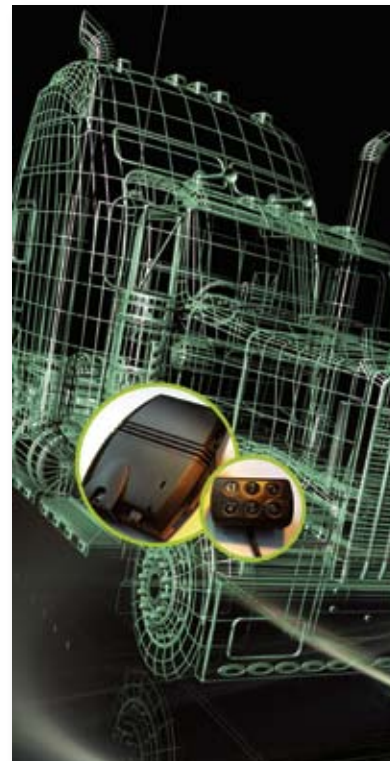

**E**stablished in 1985, ERM electronic systems Ltd is a major supplier and a manufacturer of GSM/GPS tracking devices and anti-theft /security solutions products.

With over 200,000 GSM/GPS units sold globally, E.R.M. R&D keep developing new products and solutions such as the recently "launch-n-forget" TUBE; the asset monitoring device.

keypad, black-box for safety applications, harsh brake sensor, accident sensor, Temperature monitoring, Analog/Digital interface, FMS adapter, CanBus and more. The AVL scalable structure is offering a solution for most fleet needs.

## Asset Tracking

The new TUBE is designed as a "launch-n-forget"

E.R.M. Electronic Systems Ltd.

## E.R.M. Product Line Includes:

The latest STaRlink GSM/GPS tracking devices platform is offering:

- **eBIKE:** a most attractive motorcycle designed device offering a full package of tracking, anti-theft alarm and accident alert (safety) including a very convenience hands-free proximity remote keyfobs. The eBIKE performs water and vibration proof and a very low power consumption. Concerning the motorcyclist safety, the eBIKE will immediately alert and page whenever accident is involved.
- **AVL:** based on the above platform, the AVL is offering a comprehensive solution including voice support and a wide range of peripheral accessories such as: DriverID (Dallas iButton or dashboard mount keypad) using a dashboard mount

solution allowing up to 3Y of functioning without being charged.

## Immobilizers

Wide range of Keypad controlled RF wireless immobilizers allowing maximum security concealment and easy fitting.

## Alarm Systems and Anti-theft

Wide range of car alarm systems supporting several sensors and accessories.

## Sensors

- Perimeter sensor
- Harsh brake sensor
- Accident sensor
- Fuel Consumption Adapter
