Ein Shemer Rubber Industries produces high quality rubber products for local and world markets. The company develops, manufactures and markets a wide range of tire retreading materials, rubber hoses, rubber profiles, technical products and rubber compounds. Ein Shemer provides customers with a broad array of high quality, customized design and off-the-shelf products, which offer good value and a competitive edge.

Other Important Information
Proven Technologies

Ein Shemer's modern rubber technology equipment include mixing, extrusion, pressing and injecting methods, calendaring and modern cutting technologies. Products are based on a wide range of conventional and advanced elastomers.

Expert Personnel

Ein Shemer has a staff of over 140 employees including engineers, scientists and technicians.

Research and Development

This experienced team of engineers and technicians works with clients to manufacture products to exact customer requirements and to expand their markets.

Marketing

Ein Shemer Rubber Industries has marketing outlets throughout the world. The company's major objective is to provide clients with a full line of services that help them capture and maintain markets. Ein Shemer's highly professional staff provides customers with continuous contact and prompt delivery. The company's production and sales are targeted towards the international market with exports to Europe, Scandinavia, Australia, North and South America and the Middle East.

Quality First

Ein Shemer places great emphasis on quality issues and takes great pride in its culture of quality. All products designed and manufactured at the plant undergo rigorous quality and reliability testing in accordance with ISO 9001-2000 standards. Quality control personnel are responsible for performing regular sampling during all stages of production to ensure high quality products and adherence to requirements.

Certifications: MPA BAU, DVGW, DIN 7865, BS 6920, EN 681, KTW, EN 682, NSF 61, ACS, DIN 4060 and many others.

Seeking

Joint Venture Capital; Long Term Customers; Strategic alliances.

Products

Profiles include those for building, tunnels, infrastructure, water transfer, vehicle and industrial applications. Hoses of 3mm-38mm inner bore and up to 60 bar are produced according to major international standards. The company's tire retreading range includes over 30 pre-cure tread designs and auxiliary materials for hot and cold retreading systems, technical products produced by pressing and injecting methods. Superior quality rubber compounds are produced for internal and other companies needs.

Ownership

Ein Shemer Rubber Industries is owned by Kibbutz Ein Shemer in Northern Israel.
