& Systems

Elisra Electronic Systems Ltd. (The Operations Division)

Elisra is a leading defense electronics systems manufacturer, with a global reputation for quality, reliability and leading edge technology. Building on 40 years in Electronic Warfare (EW) systems and Turnkey projects, and supported by intensive R&D facilities, Elisra has expanded its horizons. Elisra offers a diversified and expanding product line and is internationally recognized as a top contractor for turn-key, fully integrated projects.

Your Full Turn-Key House for Build-To-Print Programs

Development and Design are not enough for your products to lift off. Production capabilities are a must. For your final products to meet all relevant criteria, you need powerful and reliable resources: Contact Elisra's Operations Division. Our credentials include over thirty years of experience in manufacturing sophisticated, field-proven aerospace, naval and ground equipment.

The Operations Division's build-to-print and build-to-spec capabilities combine advanced electronic and mechanical production facilities with stringent quality and reliability to the highest military standards. The result is a line for perfectly assembled products, packaged, tested, screened & ready to install.

Operations Division as a Full Turn-Key House - Highlights

- Procurement and components acquisition
- Electronic & Mechanical manufacturing, and assembly to customer Mil-Standard
- Manufacturing of customized electronic modules: PCBs, racks and assemblies
- Screening and final product testing (full ATP)
- Special-to-type testers
- In-house environmental testing (HALT & HASS)
- Configuration management
- Technical documentation
- ISO-9001 certified

Technical Documentation

The Technical Documentation Unit can deliver comprehensive and turn-key technical documentation projects. Its experienced technical writing, technical drawings (general, electrical and isometric) and graphics capabilities are completed with printing, production and archiving in-house sections. The Unit also features training and instruction facilities to introduce the equipment into service as smoothly as possible.

Ownership

Elisra Electronic Systems is part of the Elisra Group with annual sales for 2009: US\$263 million. The Group is owned by Elbit Systems Ltd. (70%) and IAI Elta Electronics Industries Ltd. (30%).
