Amos Nevo
VP Business Development

Foamotive produces Expanded Polyethylene Foam parts by thermo-compression (fusion). The raw materials grades are produced by PALZIV, our holding company. The thermo-compression products are typically 3D complicated parts with closed cells and external skin that do not absorb water and offer excellent isolation and tight fit with metal and plastic structures.

These parts are used in several automotive applications:

- Gaskets and sealing for external mirrors - eliminate wind noise and humidity penetration.
- Noise Vibrations and Harshness solutions (NVH) - noise shields/covers and vibrations restraining inserted in hollow spaces.

- Plugs, grommets and conduits for low friction pass of cables and pipe lines.
- Hot air deflectors in engine compartments.
- Roof rail profile plugs and seals.
- Speaker back walls for correct direction of sound.

Customers Base

We supply parts to Automotive OEM and Tier-1 suppliers in Europe and in the USA: VW, SEAT, Audi, PSA, Magna Mirrors, Ficoso, SMR, and more.

Production Sites

Israel – central office, R&D, tooling and production
Romania – In Timisoara - production site is included in TROPAL, the supplier of PE foam.
USA – a new production site is planned for 2010 in North Carolina, USA.

Quality Assurance

Foamotive is certified for ISO 9001, ISO 14001 and ISO/TS 16949. The production site in Romania is also certified ISO/TS 16949 and had been audited by major OEM customers.

Marketing

The central office in Israel and local representatives in Germany, Spain and USA handle new customers and projects and support ongoing production orders.

Engineering

Foamotive has excellent experience in designing customized parts through close collaboration with the customers' designers.

We can support rapid development and short lead time to serial production.

The support of Palziv materials development contributes to the choice of appropriate raw materials that comply with customers' specifications. Competitive prices and high quality parts are the pillars of our leading position in the market.

Seeking

Long term contracts for products supply including collaboration in design and development of foam applications
