

Gal-Shvav Group (GSG)

Line of Business

Manufacturing, System Assembly, Turn Key Projects
R&D Services: Mechanic-Optomechanic, Series Manufacturing

Established

1990

Leading Executive

Mr. Eran Dvir

Gal-Shvav Group (GSG) is a private firm with over 20 year experience providing excellence services record in manufacturing, assembly and integration, engineering support and cost effective R&D with optic and control engineering capabilities GSG is a leader in its field.

Group Structure

Gal-Shvav Ltd.

- Turn key projects
- Precise manufacturing
- Logistic support

Einat Technologies Ltd.

- R&D
- Prototypes
- Engineering support

Nir Mechanics Ltd.

- Metal sheet work
- Frame manufacturing

Our Services

GSG provides a wealth of Turnkey Products that includes high precision manufacturing, clean environment, controlled processes, critical test and cost-effective process.

Projects range from complex to simple and from small components to complete turnkey production lines.

GSG developed unique expertise of machined parts for world-class manufacturing of robotic component, high accuracy vacuum chucks and more.

GSG with it's in-house R&D team Einat Technologies can join your team in new products design, support for new processes, upgrades and cost reduction programs.

All together we bring a comprehensive, reliable and profitable solution for your need.

Assembly and Integration Department

- Clean Room Class 10000
- Clean Room Class 1000
- Clean Room Tent @ Class 1
- Assembly room for non clean assemblies
- Final testing per customer specs
- Critical Cleaning

Value Added Services

Prototype design of with fast lead time Gal Shvav advantage is to provide you with the full service from design through first article than to volume manufacturing.

Confidentiality of proprietary technologies assured Stringent testing for pre-shipped quality control (fixture per Customer SOW) Registered ISO 9001 2000.

End-to-end services under one roof

Complete turnkey solutions, delivered quickly and reliably Full support in logistics, MRP, purchasing OEM, QA Wide spectrum of engineering skills benefit you for multi disciplinary system design and wide range of industries using Vast knowledge of manufacturing methods enables optimized upgrades and cost reduction.

Technologies and Special Expertise

- Microelectronics
- Electro-optics
- Sand Casting
- Know-how to convert or create designs
- Short turnaround time
- Cost-effective parts
- Semiconductors
- Robotic and control systems
- Dedicated wafer handling systems
- Miniature mechanics
- Pneumatic and hydraulic expertise
- Equipment for testing and
- Adjustment

Gal-Shvav services a wide range of industries

- Research institutions
- Medical
- Military
- Food and general consumers
- Semi-conductor
- Printing Electronics
- Telecommunications
