

# Galcon

## Line of Business

Water Control Systems

## Established

1983

## Leading Executive

Mr. Sagi Rubin  
CEO

**G**alcon is a world leading manufacturer of computerized irrigation controllers and systems, for use in home gardens, agriculture, landscape and municipalities.

Over the years Galcon has turned the development of irrigation controllers into a science. We conduct research in the field and the lab, intensively investigating technical capabilities, making computerized controllers and systems more suitable to specific applications while being user friendly. In this time of heightened attention to water use and budgeting irrigation, controllers and systems have become an essential.

We abide by the philosophy of "no field is too large, garden too small or application too demanding".

Gardening  
Home & Professional

Agriculture  
Open Field  
& Greenhouses

## Home Gardening Controllers

Our wide range of DIY (Do it yourself) user-friendly, battery-operated controllers are ideal for the amateur home gardener interested in perfecting a personal green thumb.

## Professional Gardening

We offer an extensive array of specialized AC and battery operated controllers including wireless irrigation controllers and smart, web based controllers, designed for professionals.

## Agriculture Applications

Our new, state-of-the-art irrigation systems and controllers series is designed for agricultural use: open fields, greenhouses and climate control. From the simplest to the most complex application, we have the answers.

## Landscape Irrigation Solutions

The CityGal irrigation controller is a central control, web based system for irrigation and water budgeting for public landscape. It continues the legacy of Galcon irrigation products that are famous for their simplicity, efficiency and reliability at reasonable cost.

## PRV

Galcon's pressure management controller and solution designed to optimize the pressure level in water supply networks of water utilities and municipalities. Galcon's solution was designed according to the IWA (International Water Association) methodology.

## Ownership

Galcon owned by Kibbutz Kfar Blum and by Whitewater Group.

## Other Important Information

**Employees:** 70-80

**Strengths and Expertise:** Water and irrigation control and efficiency.
