

GES Global Environmental Solutions Ltd.

Line of Business

Water and
Waste Water Treatment

Established

1997

Leading Executive

Mr. Zohar Polovin

GES, an international front runner in the Cleantech field has exclusive experience, expertise, and human capital invested in the water business. Throughout the past two decades, GES has validated its value in hundreds of projects both in Israel and worldwide.

GES has been providing clean water to thousands of satisfied customers in Israel and abroad for many years. Our solutions are economically viable and conform to the most stringent of standards. We offer maximum availability, cutting-edge technology, and incomparable quality.

We at GES rely on the unique combination of substantial professional knowledge: the cumulative experience of hundreds of projects, and sound financial backing. The company employs skilled personnel, including some of the most experienced professionals in the field today, working alongside a vigorous younger generation being nurtured as future leaders.

Our clients

At GES we provide our clients with solutions that take into account technology and the environment, as well as regulatory and financial constraints. We allow our customers to choose the place, the time, and the scale, as well as the cost and manner of financing. You can choose an overall solution or specific services to suit your needs, including:

- Detailed process planning: In-house design and production of essential equipment
- Skilled start-up and commissioning teams
- Experienced operation and maintenance teams
- Advanced laboratory services
- Mobile laboratory
- Financial solutions using Turn-Key/BOT/Water outsourcing methods.

Our customers come from many sectors: chemical, petrochemical, electronic, and metal industries; food and beverage industries; cosmetics and drugs; insti-

tutions; governmental authorities and municipalities; industrial plants; military entities; and others.

Our business

- Water and wastewater treatment business
- Desalination of sea and brackish water.
- Water purification and wastewater treatment for the industrial sector.
- Purification of water and wastewater in the municipal sector.
- Representation and the application of chemicals for treating water.
- Operation and maintenance of all water treatment facilities.

GES is a leading company in these fields and competes in international markets.

Industrial Chemicals Business

GES has an industrial chemicals division that specializes in the following fields:

- Chemicals and finishing processes for metals
- Chemicals for preparing surfaces for painting and industrial paint stripping
- Materials for electrochemical plating
- Industrial cleaning materials
- Special adhesives and lubricants for industry.

GES represents leading international chemical companies via knowledge agreements.

Our History

GES was created as a result of a merger between three veteran Israeli water companies: Italchem Ayalon, Aniam, and Chemitaas.

In 2002, GES acquired Texma, a firm specializing in industrial adhesives, lubricants and chemicals for treating metals.

Ownership

GES is owned by Granite Hacarmel Investments Ltd (1981), a public holdings company traded on the Tel Aviv stock exchange since 1992. The Granite Hacarmel group includes, among others, leading companies operating within the petroleum and energy fields, the paint industry, chemical industry, tourism, and real estate.

Granite Hacarmel is controlled by the Canit HaShalom group owned by the charitable Canadian businessman David Azrieli. The Canit HaShalom group is Israel's largest and most profitable real estate holdings company providing GES with robust financial support and top managerial assistance.
