Greenshpon Engineering works has been in the forefront of the technical industry since it was established in 1952.

Today we are well-known experts for speciall tailor-made gears. Our Knowhow is supported by the appropriate equipment. We are in a position to provide technical solutions for all types and all quantities.

Engineering

AT Greenshpon we meet the demand for maximum reliability and the highest quality of our designs at minimum cost.

At Greenshpon, quality means management commitment to employ the latest manufacturing technology at every stage of production. From receiving the order to delivering the finished product, every operation is double checked.

We assure a level of accuracy and reliability equal to your most demanding specifications, including design and production according to ISO standarts.

Production

The technical skills of our personal and our strict standards for quality assurance enable us to supply you with the most sophisticated product, regardless of the complexity of the components and their configuration.

You are invited to consult with our dynamic team of engineers. They will assist you in creating trasmission systems and solve problems which occur with efficient output and unfailing reliability of

the final product in order to meet the requirments of your specific application.

Application

Our customers come from a wide international spectrum of the industrial world. We are familiar with the various needs of high – tech, medical instruments, radar telemetry, etc., also with those of

manufacturing installations for manifold industries such as: food processing, backing, agricultural equipment, general mechnery, plastic industries, chemical industries, mining and transportation industries.

Combining old fashioned customer relations with advanced technology, we will tailor – make the gear you want with the quality you need.
