

Habonim Industrial Valves & Actuators

Line of Business

Industrial Valves & Actuators for Industries such as: Pharmaceutical, Oil & Gas, Food & Beverage, Chemicals, Offshore, Petrochemicals, Power Generation, Mining

Established

1960

Leading Executives

Mr. Niv Shimron
CEO and President

Mr. Chaim Schwartz
International Marketing
& Sales Manager

Habonim is a leading manufacturer of ball valves and pneumatic actuators. With over 50 years' experience, the company enjoys a worldwide reputation for its high quality, innovation and engineering expertise, and offers the industry's best customized services.

Habonim supplies a wide range of 3-piece and flange ball valves, as well as tailor-made solutions, generating significant cost and space savings for its customers. All Habonim products meet international standards and are engineered to work safely and efficiently in a variety of applications.

Industry Solution Provider

Habonim products provide high quality durable and reliable solutions to the main industries:

- **LNG (Liquefied Natural Gas)** - Habonim's Cryogenic Valves consistently meet the requirements of Industrial LNG processing, ensuring the properties of gas are maintained and that the process is carried out safely and effectively.

ent-pending HermetiX™ technology, providing additional safeguards to the valve stem design in critical applications. Hermetix offers ZERO-Stem-Leak which is crucial in the chemical industry.

- **Pharmaceutical** - The 48 TuBore Series is the Habonim line of clean ball valves for the pharmaceutical and bioprocessing industries. These valves are designed for applications which require maximum flow capacity at minimum pressure drop, where sterility, cleanability and drainability are essential for faultless product quality.

Advanced Design and Flexibility

Research, development and continuous technological advances ensure that Habonim stays in the forefront of the industry. Habonim's expertise in valve design means that the company can supply not only standard valves, but also complex custom designed valve packages for many applications. As a result of its on-going modification and upgrading of current valve designs, together with the development of new valve products. Habonim offers the highest degree of sophisticated products that meet customer requirement.

Sales: The Company's sales have continuously increased, and are expected to continue growing in the future. More than 70% of production is for export with the main markets being North America, Europe, China, Russia, Asia Pacific and South Africa.

- **Petrochemical** - Habonim's tough metal seated ball valves (MTM) are specifically designed to operate under the severe conditions of the fractional distillation, hydrocracking and treatment processes. Habonim has been granted certification by SIRA covering automated packages intended to work in a SIL2/SIL3, which demands the highest levels of reliability.
- **Chemical** - As part of its Health & Safety initiative, Habonim has introduced its unique, pat-
