Mr. Vladimir Zalman

COO

The HAM-LET Group, a well-established international leader, specializes in the design, development, production, marketing and sales of high quality instrumentation valves, fittings and other components.

Ham-Let products, available in a wide variety of materials for high pressure, temperature and vacuum applications serve high purity equipment, process control and fluid delivery systems for instrumentation. The company products are used in a diversified range of industrial segments such as: oil & gas, process, chemical, petrochemical, energy, semiconductor, biotechnology, pharmaceutical, and others.

Ham-Let offers a combination of production stability, state-of-the-art technology of product integration and assembly, top quality and

State-of-the-Art Manufacturing Complex

Ham-Let devotes a significant part of its resources to research and development of new products with the main orientation being tailoring the product range to the constant upgrade of its customers' applications. The company employs a staff of science, engineering, software and service technologies experts to ensure a uniformly high standard of product quality control. As a result, the company products meet the highest quality standards and are certified, among others, for ISO-9001, Lloyds TNO, S.A.E. & CE Standard, MIL-F-18866, ASME and ASTM.

A Specialised Product Portfolio

The company core products – instrumentation valves and fittings, play a major role in ensuring its customers'

unrivalled customer service, all backed up by in-house research and development activities.

Brief Overview

Established in 1950, Ham-Let is located in its own industrial park with facilities for offices and a fully automated robotized production center for manufacturing, assembly, testing and packaging. The site has eight separate buildings comprising class 10 and class 100 clean rooms, an R&D department, and a raw materials and automatic logistics warehouse. Ham-Let Group has subsidiaries in the USA; the UK; France; Germany; Canada; Japan; and Russia. In addition to these, it has a vast number of stock distributors in North America, South America, Europe, Asia, Africa and Australia.

The company is traded on the Tel-Aviv Stock Exchange (TASE) since 1994 with Discount Investment Corporation (DIC) being one of its major stock holders.

applications run safely, trouble-free and efficiently, and are aimed at oil and gas exploration; drilling, production and refinery applications; the power industry; instrumentation, sensor, analytical and control systems; pulp and paper manufacturing; food, beverage, and dairy industries. Ham-Let process instrumentation valves and fittings are known to achieve outstanding performance characteristics without external degradation from abrasion, corrosion or cavitation. Ham-Let ultra-clean diaphragm valves and fittings, targeted toward semiconductor, pharmaceutical, solar energy and other applications where clean working environment is a mandatory requirement, are resistant to high/low pressure, high temperature, and are compact in size with a low profile. In addition, the company has a wide range of related products, such as filters, hoses, meters and cylinders.

All of these products are manufactured in compliance with the American National Standard Weights and Dimensions of Welded and Seamless Wrought Steel Pipe; according to ANSI B36.10-1985.
