

Hanita Metal Works Ltd.

Line of Business

Cutting Tools

Established

1954

Leading Executive

Mr. Michael Shemer
General Manager

Hanita Metal Works Ltd. manufactures a wide range of state-of-the-art cutting tools for the global metal machining industry, including Solid Carbide and HSS end-mills and Carbide drills.

Produced from premium tungsten carbide, high-speed steel, and premium powder metal high-speed steel, Hanita tools are specially adapted to meet the demands of today's most advanced manufacturers from the Aerospace, Automotive, Medical, and Mold & Die industries.

Recognizing the uniqueness of every customer, Hanita is also known for its creative versatility in developing custom - tailored specialty tools.

Financial Data

Sales: 60M\$

Other Important Information

No. of employees: 250

Highly experienced application engineers and CNC programmers implementing state-of-the-art 'lean manufacturing' processes, utilizing modern CNC equipment from world class manufacturers and specifically 'in house' designed and manufactured CNC grinding equipment.

Hanita Metal Works Ltd. markets its products worldwide, in North America through its subsidiary in NJ, in Israel through its own salesforce and

in the rest of the world through Kennametal branches or local distributors. For further information, please visit our website at www.hanita.com.

Hanita Metal Works Ltd. is a major supplier of quality standard cutting tools as well as application oriented milling cutters and drills for various highly professional industries. Aerospace, Civil and Defense, Medical, and Mold & Die are the highest focus

of the company while making a steady and successful introduction into the Automotive industry worldwide.

Certification

Making quality a top priority, Hanita Metal Works Ltd. is ISO 9001 certified, and in the process of receiving ISO 14001 and BSI 18001 certifications. Hanita is under the continuous supervision of the Israel Standards Institute.

Environment

Environmental issues are no less a priority at Hanita, where tight control over all manufacturing and distribution operations is a rule, as well as recyclable packaging and environmentally safe cleaning substances, and where close supervision of sensitive materials is strictly implemented.

Over the past 50 years, Hanita has achieved a reputation for reliability and innovation, leading the industry with new, ever more efficient products, designed and manufactured to meet the highest industry standards, while providing its customers with competitive machining solutions.
