

Israel Aerospace Industries (IAI)

Established
1953

Leading Executive
Mr. Itzhak Nissan
President & CEO

Israel Aerospace Industries (IAI) is a globally recognized leader in the defense and commercial markets and Israel's largest defense industrial exporter. IAI's backlog as of June 30, 2010 reached a record of \$9.1 billion. IAI total sales for 2009 rose to \$ 2.9 billion of which 2.2 billion were for export. IAI's products and technologies are fully backed by Integrated Logistic Support (ILS), training and after-sales service. In overseas contracts, IAI works with local partners through technology transfer agreements.

CORE AREAS OF ACTIVITY

Space

From its own launchers and satellites to ground services, IAI offers customers affordable solutions and partnerships with industry leaders in space

MRO & Civil Aircraft Conversion

IAI is acknowledged worldwide as a leader and Full Service Provider for the maintenance, repair, overhaul and upgrade of commercial aircraft. All the required services are performed under one roof. The company is also a world leader in converting passenger or PAX aircraft to full freighter aircraft.

Unmanned Aerial Systems (UAS)

IAI has earned a reputation of being a world leader for Unmanned Aerial Systems (UAS). The company offers a family of systems which vary in size, endurance, and on-board sensors, covering the full spectrum of operational requirements by providing micro- and mini- systems, as well as tactical Close Range and Medium Altitude Long-Endurance (MALE) systems.

TECSAR
Family of Lightweight Observation Satellites

Conformal Airborne Early Warning (CAEW) Aircraft

HERON TP
Medium Altitude Long Endurance UAS
System for Strategic and Tactical Missions

exploration. IAI develops and produces satellites for various purposes such as Low Earth Orbit (LEO) observation satellites (Ofeq, Eros), Synthetic Aperture Radar (TECSAR) and communication satellites such as the Amos series (GEO).

Theater Defense

IAI's Arrow Weapon System against Tactical Ballistic Missiles (ATBMs) leads the market. This multi-layer system, representing outstanding visionary and technological achievements such as the Green Pine missile detection and fire and control radar, as well as other interoperable solutions, is the cornerstone of Israel's defense system.

IAI's UASs have accumulated more than 750,000 operational hours.

Naval Systems

IAI develops and manufactures maritime multi-mission patrol boats such as the Super Dvora Mk III. Barak is a ship-borne point defense system which functions as a sea-to-sea and sea-to-surface missile. IAI also produces EO payloads and naval/maritime radars for various platforms such as helicopters, UASs and other aircraft. IAI also modernizes and upgrades vessels, weapon systems, and defense systems, and conducts system integration for customers worldwide.
