# Lesico Projects Management Ltd.

## The Lesico Group

**L**esico Projects Management is a leading Israeli company that provides integrated solutions for the planning, management, upgrading and construction of land border crossings and cargo terminals, including state-of-the-art electronic, communication & control systems and defense support systems.

LESICO delivers expertise, experience, and excellence – everything you need from the company that will plan and build your next border crossing or cargo terminal.

### LESICO Services Include

- Conducting the prerequisite surveys essential for characterization of new border crossings or upgrading existing ones
- Characterizing needs and work methods at border crossings
- Formulating the operational concept for the border crossing
- Creating a master plan for building a new border crossing or upgrading an existing one, including recommendations for equipment
- Drafting the engineering plans, including all components and equipment
- Management, supervision and control of the entire project. Projects are supervised by highly qualified civil engineers, QA & QC engineers, and environmental experts
- On-site construction of the border crossing or upgrading an existing one, in strict compliance with quality standards, schedules and deadlines
- Providing comprehensive documentation, staff training and support for operating the border crossing
- Result: an optimal, viable, long-lasting solution, precisely tailored to your needs.
