Established

1950

Israel's leading fire protection equipment manufacturer, LVT specializes in the development of fire protection and suppression systems for the military, industrial, and commercial sectors.

Proven Military Experience

A wholly owned subsidiary of Lehavot Fire Protection Ltd., established in 1950, LVT benefits from Lehavot's extensive experience in the research and development of fire suppression systems. LVT's unique know-how in military applications is based extensively on Israeli battlefield experience.

with a quick turnaround. The company's expert R&D and engineering teams customize its high-tech systems to meet customer's specific needs, tailoring products to meet the toughest conditions.

World-Class Testing Ground

LVT is the only Israeli company that operates an in-house fire testing complex, recognized by the Standards Institute of Israel (SII) and the National Fire Commissioner. An ISO 9001 certified quality control system is in operation at the factory. Lehavot is approved as a B-level supplier by the Ministry of Defense. All products meet Israeli (SII) and relevant international standards.

Key Products & Services

The company designs and manufactures unique multi-zone systems for military applications, used today by the US Army and the Israel Defense Forces. The high-tech fire protection systems are implemented in vehicles, vessels, tanks, and other military applications. The company is recognized by defense contractors worldwide as a trusted source for all their fire suppression needs.

Innovative Patented Technology

LVT invests heavily in continuous research and development to provide cost-effective, reliable products and systems with outstanding performance in harsh environmental conditions. The cutting-edge, environment-friendly technologies are designed to effectively protect lives, equipment, and property.

LVT develops UL and CE listed and certified WCK kitchen fire suppression systems catering for the needs of small and large kitchens, from privately owned businesses to large commercial and industrial kitchens. The company also develops solutions for industrial machinery and vehicles, such as CNC machines, cranes, combines and more.

Designing, Testing, Manufacturing - All Under One Roof

From concept to finished product—LVT's one stop shop offers custom designing, modeling, testing, and manufacturing of fire suppression systems in its fully equipped industrial complex, enabling completion of even the most challenging projects

Serving Customers Worldwide

LVT provides customers with internationally recognized fire suppression solutions that combine exceptional quality with competitive pricing.
