Leading Executive

Mr. Shlomo Eisenberg
CEO

Malam-Team Group is Israel's largest and most diversified local ICT organization. Malam-Team is an established leader in the development, implementation and support of large multi-disciplinary software programs. Malam-Team's expertise includes Systems Integration, Software Development, Project Management and Quality Assurance.

Malam-Team has developed many of the largest Projects in Israel including the central Government Customs System, The Israeli Country-wide Elections System and A large Pension Management System.

Unique Product Offerings

Malam-Team has developed two large software frameworks for Public Security applications. These solutions are successfully implemented locally. Malam-Team enhanced these solutions and adapted them to provide exceptional functionality worldwide:

of these devices securely and reliably. The roadside devices can be managed, calibrated and controlled directly from this center. A secure interface to police ticketing systems is also available.

Hope - Homeland Operations and Protection Environment.

The Hope framework is designed to act as a "Single View" Operational Support System for Homeland Security, Safe City, C4I, Strategic Infrastructure monitoring, Command and Control and Emergency Event Management.

The Hope Framework can be easily adapted to many application requirements including the ability to have a series of layered command and control centers that filter data to a more central installation.

Hope has an intelligent and configurable rules engine, multilayered GIS support and built-in in-

Teams - Traffic Enforcement and Management System

This end-to-end system provides a holistic approach to traffic enforcement and traffic management. Various enforcement devices such as speed cameras, red-light cameras, average speed detection devices and video traffic monitoring systems are supported.

The system also included a configurable command and control center to manage a wide area network

interfaces to many sensors and communications device infrastructures.

Ownership: Malam-Team is a public company traded on the Tel-Aviv Stock Exchange.
