

Meltzer Communications Ltd.

Line of Business

Satellite communications

Established

1987

Meltzer Communications Ltd is a private limited liability company established in 1987 and is ISO 9002 certified.

The company specializes in the management and supervision of Turn-Key projects for customers locally and internationally. Our teams install and maintain earth station antennas, VSAT systems and affiliated transmission equipment.

Our customers benefit from our initial planning procedure which encompasses the customers' technical, budgetary and environmental requirements.

Over the years we have supplied and installed hundreds of satellite dishes ranging from 3m - 18m.

Through this valuable and extensive experience, we have gained an international reputation for efficiency, precision and value.

Design

Meltzer Communications provides technical design services for teleports & broadcast companies, as well as security and military applications.

Further, we are able to provide a complete RFP (for organizations who are unable to design their own systems), link budgets, drawings and other required documentation.

Integration

Meltzer Communications integration services include cross project activities.

This ensures on-schedule and successful projects.

Meltzer's engineers are highly qualified to perform

the following tasks:

- Link budget and RF calculations
- Electric and RF system drawings
- Power consumption plans
- Civil work consultancy and supervision
- Integration services to other systems or equipment
- Manufactures DSNG systems that can fit the customer budget and needs

Meltzer Communications, as the project integrator, provides a complete and comprehensive warranty for its turnkey projects.

Installation

Turnkey solution offers customers the opportunity for the installation of a complete Earth Station project wherever it is required.

Meltzer have installed Earth Stations in more than 50 countries around the world. Including problematic areas such as: China, India, Kazakhstan, Nigeria, Kenya, and Peru etc.

We are able provide on-site inspection of civil works as part of the installation.

The installation process will also include antenna commission, testing with the satellite provider and final ATP of the complete system.

Maintenance

Meltzer offer maintenance services as follows:

- "Per call maintenance" for breakdown events, as well as preventive maintenance - subject to a service agreement.
- Customers can decide the level of maintenance required according to equipment, location and budget.
- Relocation services (dismantling and re-installing) of Earth Stations worldwide.
- Options for upgrading and renovating antennas and equipment to maximize performance.

Manufacturing and selling earth station electronics related replacements such as tracking system electric cabinet etc.
