Mr. Amir Shmshkovitz
Managing Director

Mr. Levy Vider
Technical Manager

Mr. Eli Albert
Operation Manager

Mr. Eyal Wieder
Business Development

Mrs. Osnat Shira
Finance Manager

Migam Ltd. specializes in manufacturing complete product lines including:

- Quick disconnect couplers for pneumatic, hydraulic, fuel, gases, water and special purposes
- Reusable and rigid hose fittings for low, medium and high pressure
- Air and hand operated pumps
- Valves and connectors for special purposes
- Fuel management systems

Ministry of Defense: Products according to Migam's designs and sub-contracting military products including fuel system assemblies for heavy vehicles, fire extinguishing products for heavy and light vehicles and general purpose and parts for weapon etc.

Israel Aircraft Industries: Aircraft parts.

Oil Companies: Standard lines of pumps and pneumatic products, the mechanical parts of fuel management systems that are fully designed by Migam.

Exports

Migam exports about \$1 million annually to the U.S. and Europe. The company's main customer in the U.S. is Parker Hannifin who purchase a complete line of pneumatic safety couplers designed, developed and manufactured by Migam and considered as top-of-the-line in the U.S. These couplers are mainly sold in the U.S. to high-tech users including the aircraft and missiles industries.

Products are also sold to Tacom and other U.S. companies.

Migam also sells specially designed silicone free couplers and pumps to the car industry in Germany (through an agent).

Company History - Experience & Expertise

Migam was established in 1953 by the late Moshe Shmshkovitz and Albert Kimchi. Today the company is managed by Amir Shmshkovitz who has been with the company for 43 years. With 40 employees the company is located in the heart of the Holon Industrial Zone near Tel Aviv and has facilities for designing, manufacturing and assembling products. Migam's experienced and highly qualified staff pride themselves of the newest methods in metal machining and the latest production innovations.

Customers

Aside from producing standard lines of pneumatic and hydraulic devices for the commercial market, Migam subcontracts for the defense establishment, Israel Aircraft Industries, oil companies and others.

Quality Control

Since 1996 Migam has been ISO 9001:2000 certified.

Production Accuracy

Production accuracy is to 0.004" and the company's state of the art equipment includes CNC lathes, machining centers and machines for secondary operation. All computerized machines are based on the FANUC computer.

Size of parts from bars are up to 2" and materials used are non-ferrous metals, steel, stainless steel, and special alloys.

Capacity

Capacity of working hours is about 6,500 hours per month in three shifts.

Migam has the ability to increase machining capacity if needed.
