

MPE

Line of Business

Integrated Metal and Plastic Components

Established

1999

Precision from design to assembly - MPE specializes in advanced design, production and assembly of precisely integrated metal and plastic components.

Complete tailored solutions

MPE provides global clients with a complete quality engineering and manufacturing solution that brings products to life with exceptional quality and expedited time-to-market.

- Innovative Engineering
- Precision Tooling
- Quality Manufacturing

International Standards

The MPE production environment exceeds global quality, technology, environmental and safety standards. featuring advanced software compatible with our customers preferred systems throughout their product development lifecycle:

Certification

- ISO 9001 2008
- ISO EN 13485
- TS 16949
- Clean-room production class 100,000
- Production according to GMP

- Advanced Assembly
- Just-in-time (JIT) Delivery
- Flexible Service

Unique Benefits

- Tailored engineering & manufacturing flexibility optimizes end product performance
- Rapid responsiveness to dynamic customer needs throughout product development and production
- Uncompromised quality with competitive pricing
- Accountability. One dedicated service provider managing all sub-contractors from design to delivery

Market Leading Expertise

Every MPE customer benefits from decades of engineering, manufacturing and service expertise, combining the most advanced technologies available with highly skilled personnel worldwide.

- Automotive
- Medical
- Technology
- Consumer

MPE global customers also include leading CleanTech, Aviation and Defense companies.

Software

- CATIA-V4, CATIA-V5 (16,17,18,19)
- PROE: 2001i, WF2, WF3
- I-Deas
- Solid Works 2007, 2008, 2009 (all basis with sheet metal), 2009 professional (with Feature Works, Toolbox and PhotoWorks)
- Cimatron
- Master CAM Auto CAD

MPE facilities feature the most advanced manual and automated assembly lines, and the most sophisticated, cutting-edge manufacturing equipment for quality, high-volume production.

MPE - your ideal choice when precision is as important as innovation.
