MTI antennas are installed on various Airborne, Ground, Naval surface and sub-surface platforms worldwide. Military clients include, amongst others, the United States Navy and the Israeli Defense Forces with Air, Land & Naval applications.

MTI, by leveraging its military technologies, provides sleek, low profile, lightweight and esthetically designed commercial flat panel and Omni directional antenna solutions, capable of withstanding severe environmental conditions, for PTP & PMP and applications in the entire range of frequency bands from 0.4 to 90 GHz for both subscriber and base-stations.

MTI serves an impressive OEM client list. The company develops standard and customized an-

Capabilities

MTI antennas can also be mounted conformal to the radio or any other platform, thereby reducing the need for external cable, wave-guide and other installation costs.

MTI has registered patents on its Point-to-Point and Point-to-Multipoint technology. In addition, MTI maintains three outdoor antenna test ranges and a compact range.

Seeking

MTI seeks alliances within the Military and the Commercial antenna industry, with system houses using the type of antennas we produce.
