Netafim is the global leader in smart drip and micro irrigation solutions for a sustainable future. With more than 31 subsidiaries worldwide, Netafim agronomists and engineers deliver optimal solutions to growers in over 110 countries, with 14 manufacturing facilities around the globe and over 2,400 employees. Founded 45 years ago, Netafim pioneered the drip irrigation revolution that has created a paradigm shift in low volume irrigation technology. Netafim is jointly owned by three Kibbutzim (Hatzerim, Magal and Yiftach), the Markstone fund and the Tene Fund. The company's annual sales totaled \$504 million in 2009. Netafim is committed to providing a comprehensive service to its costumers around the world. By working closely

with growers, Netafim provides solutions for a wide range of crops: open-field crops, orchards, vineyards and more. Netafim's broad solution portfolio includes complete drip irrigation systems and computerized monitoring and fertilization control systems.

Top Quality is Our Top Priority

At Netafim, commitment to quality is a core value and uncompromising standards are applied to every facet of business, from refining development procedures through conducting exhaustive field tests to optimizing production techniques. Netafim's products are manufactured according to ISO standards, and its quality assurance system conforms to the stringent requirements of international quality standards.

on-site with each customer, the company's specialists carefully study all relevant factors and the full requirements of the grower. Netafim offers a complete set of solutions customized to the grower's needs, in any climate and terrain worldwide.

Solutions Portfolio

Netafim has attained global leadership in providing innovative irrigation solutions and water technology that enhance crop yields while sustaining the planet's vital resources. Netafim's products provide diverse and comprehensive solutions for cost-effective irrigation for a broad range of

Continuous Education and Training

Netafim operates an international instructional unit – a unique knowledge sharing resource for the company's employees, clients, suppliers and other professional bodies. Netafim Irrigation University offers professional mini-courses, seminars, tours and workshops dealing in scientific and technological innovation in all agro-technical aspects.
