Mr. A. Kaplan  
Export Manager

**N**ordia Springs is an Israeli leading manufacturer of industrial springs. The company is specializing in springs for various applications in the automotive, communication, electronics, computers, aviation, armaments, construction, agriculture, irrigation, locks, toys and high-tech industries.

The automotive systems we serve include: engine valve, brakes, actuators, mirrors, shock absorbers, rebound springs for chassis, electronics systems, wheels, dashboard, doors, belts, filters, pumps, hoods.

## Products

All types of springs using wire diameter 0.1-8 mm compression, extension, torsion, special (customer

– made) springs, forms, springs made of strip and flat material, stamping parts.

## Ownership

Nordia Springs and its subsidiaries are owned by Moshav Nordia, a cooperative settlement near Netanya, 30 km north to Tel Aviv. The company is Ltd.

## Brief History

The oldest company at Nordia group, Sprinco Ltd. was founded in 1935. Nordia Springs was founded in 1961 and A.I.C was established in 1986.

## Financial Data

Annual turnover amounts to \$11 million: 30% is exported directly, 40% is exported indirectly and 30% is the share of the local market.

## Other Important Information

### Standards

The company had been approved as QS 9000 company in 1999, TS 16949 and AS 9100, in 2006.

Nordia is a member of IST – European Spring Makers Association.

### Customers

Nordia Springs serves several well known companies of the automotive industry like: Peugeot, GM, Audi and VW, Wabco (Germany, France, Poland, Holland, Brazil, China), Woco (Germany and Czech Rep.), SMR (Hungary), Nissan (Spain – via YVEL, France), Magna Donnelly (Austria).

Our direct export for this industry includes more than 200 different articles at a volume of 1000 tons springs annually.

Nordia is serving many Israeli and foreign famous customers in other industries like Israeli Aircraft industries, Rafael, Motorola, Tadiran, Rviv, Galtronics, MPE, Barmad, Plasson, Dorot, Soda-Club, American Medical Systems, Given imagine etc.

Nordia accompanies and consults the customer in the planning/developing stage, based on its specific software and qualified team.

### Equipment and Employees

The company has 130 employees and more than 60 advanced automatic machines – German, Swiss and Japanese, enabling Nordia to answer the quality needs for every potential customer.

### Special Abilities

Nordia developed an efficient array for warm pre-stress operation, which ensures quality springs which can work in a demanded environment without relaxation. These springs are served in actuators, turbochargers, engines and clutches.

Nordia carries out full validation of the springs by fatigue testing machine, careful statistic reports and all functional tests and reports, which are needed for approval.

In several production lines, as for engine valves, 100% of the springs are tested for loads, diameters and other parameters.
