NRG Engine Treatment Product Line for Better Performance

If you want to save **MONEY & ENERGY** for your company, please pay attention to this product line.

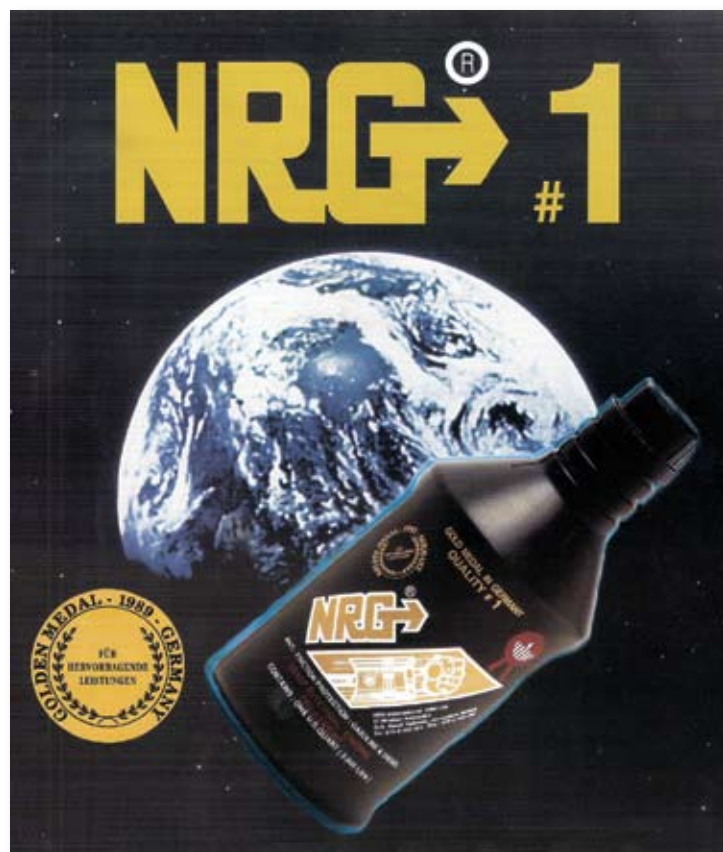

NRG's potential in the consumer market is **unlimited**. Our technology is effective for all kinds of engines: private cars, trucks, buses etc., as well as industrial, agricultural and military equipment. Among our customers: Israeli Military Industries, Israel Air, Navy and Defense Forces, Police Departments, the local Delek Oil Company, as well as large diesel and gasoline fleets, all of which have been using **NRG** with **excellent results**.

- Lowers pollution levels, up to 34.6%
- Normalizes operating temperatures
- Answer for "10 Critical Seconds" ignition

Today, more than ever before, the environment and quality of life are of paramount importance. NRG high technology has proven itself to be effective in the **battle against pollution** from engines and machinery without reducing the quality of engine performance. NRG products are non-toxic and non-hazardous products.

NRG is the only one that can reduce smoke opacity up to 34.6% (Colorado State University Test) and is environment friendly. NRG products were awarded a Gold Medal in Germany.

NRG International is searching for a serious distributor / marketing co. whose contribution to the environment is a top priority as well as great profit opportunities. Favorable government bonus grants can also be available for encouraging companies to use this environmentally friendly product. **Indeed, every country in the world is in need of NRG's successful products today!**
