

# Odis Filtering Ltd.

## Line of Business

Filters, Water Treatment for Industrial & Domestic Applications

## Established

1979

Odis has many years of experience in design, manufacturing, installation and commissioning of water treatment plants.

Odis specializes in water treatment for high pure quality for industrial use and for drinking use.

The current world water crisis led Odis to develop water recycling systems to provide solutions for reusable water.

Odis offers integrated treatment and purification systems to supply the quality of water needed from practically any source.

## Industrial Wastewater as a Threat to the Environment

Treatment of these wastewater streams (which contain high loads of BOD, COD, dissolved and suspended solids) aimed at complying with international standards is a difficult challenge to meet.

ODIS responds to this challenge with a combination of advanced, powerful and cost-saving technologies:

- Biological treatment, sludge treatment
- Membrane bio-reactor technologies
- Chemical treatment
- Ion-exchange
- Filtration

We serve the industry with tailor-made solutions for different phases of production processes in the following:

- Microelectronics and semiconductor industries
- Biotechnology
- Pharmaceutical industries
- Power generation stations
- Oil refineries
- Chemical industries
- Steel industries

## Other Important Information

**Founded:** 1979

**Employees:** 220

**Engineers & Technicians:** 25

**ODIS**  
FILTERING LTD.

## High Pure Water For Industry

- Process water with different characteristics
- Treatment of viscous liquids with a wide range of pH values.
- Water for cooling systems, heat exchangers, boilers and steam production.
