

Oran Safety Glass (OSG)

OSG is a leading worldwide developer and producer of bullet resistant, forced entry and blast resistant glass for both the automotive and building industries.

Proven Experience

With more than 25 years of proven experience, OSG offers a vast body of know-how and technology. Working closely with the Israeli Defense Forces (IDF) and military forces worldwide, receiving and processing feedback from the battlefield and other high-threat environments enhances our work and improves our results.

Variety of Products

This type of valuable, real-life cooperation has led to the development of an array of products that meets a wide variety of threat types and levels in military, diplomatic and high-risk civilian sectors. From the company's two state-of-the-art production facilities, OSG supplies cost-effective and reliable transparent solutions for armies and security services around the world.

Quality Assurance

OSG offers the highest standard of transparent armor solutions developed in accordance with the evolving needs of operational forces and backed

by ongoing IDF field experience as well as the US army and USMC performance & purchase specifications; LTAS Specs; ATPD - 2352 and DTA - 184044 requirements STANAG 4569 Standards (Levels 1 to 4) as well as equivalent U.S. military NIJ, European, German, French, DoD UFC performance criteria and IDF standards for all threat levels.

Comprehensive Services

OSG's products are effective for a diverse array of requirements, including Kinetics and FSP blast resistant. Today, OSG offers clients wide-ranging and comprehensive services, including system engineering and a complete package of technical planning for glass, metal and steel frames & custom built rubber & silicone gaskets. In addition, in-house services include the production of glass and frames, assembly of glass to frames as well as vehicle installation when required.

Innovative Features

- Bullet and fragment resistant Glass for buildings and vehicles
- Exclusive innovation - Patented designs against ever-increasing threats including IEDs
- Electromagnetic protection, Night Vision compatible and Deicing systems
- Ballistic frames (steel or aluminum) and engineered gaskets
