

Orbotech Ltd.

Established
1981

Leading Executive
Mr. Raanan Cohen

Orbotech is principally engaged in the design, development, manufacture, marketing and service of yield-enhancing and production solutions for specialized applications in the supply chain of the electronics industry. The Company's products include automated optical inspection (AOI), Direct Imaging (DI) and other production and process control systems for printed circuit boards (PCBs) and AOI, test and repair systems for flat panel displays (FPDs). The Company also markets computer-aided manufacturing (CAM) and engineering solutions for PCB production.

In addition, through its subsidiary, Orbograph Ltd., the Company develops and markets char-

acter recognition solutions to banks and other financial institutions, and has developed a proprietary technology for use, among other things, in web-based, location-independent data entry for check and forms processing; and, through its subsidiaries, Orbotech Medical Denmark A/S and Orbotech Medical Solutions Ltd., is engaged in the research and development, manufacture and sale of specialized products for application in medical nuclear imaging. Recently Orbotech has become active in the solar industry by entering into a joint venture with a company involved in the Crystalline Silicon Photovoltaic (c-SiPV) manufacturing process.

Of Orbotech's employees, more than one quarter

Laser Direct Imaging Systems

Electrical Testing Systems

Automated Optical Inspection (AOI) Systems

are scientists and engineers, who integrate their multi-disciplinary knowledge, talents and skills to develop and provide sophisticated solutions and technologies designed to meet customers' long-term needs. Orbotech maintains its corporate headquarters, executive and registered offices and principal research and development, engineering and manufacturing facilities in Israel.

The Company's extensive network of marketing, sales and customer support teams, located in over 35 offices throughout North America, Europe, the Pacific Rim, China and Japan, delivers its knowledge and expertise directly to customers the world over.
