Line of Business
Survivability and
Armor Solutions

Established
1985

Plasan provides customized survivability and armor solutions for tactical wheeled vehicles, aircraft, naval platforms and personal protection. A recognized global leader and industry veteran, Plasan's survivability solutions offer the optimal combination of protection, payload, and cost by combining in-house R&D, design, prototyping and manufacturing capabilities.

share a common language with the end user, an advantage which contributes to the development of life saving solutions.

Plasan's success is rooted in the combination of innovation, a high level of commitment and a full range of in-house capabilities. As a preferred supplier to the Israel Defense Forces and an approved

PLASAN
INNOVATE. DELIVER. PROTECT.

www.plasan.com

Plasan combines innovative survivability engineering and design with advanced armor materials development. Its unique development process is based on continuous synergy between the R&D and the Design & Prototyping departments. During this process, Plasan combines computer-generated analysis and simulations with real-time calibration and ballistic test data. The effective combination of test and simulation data enables improved simulation accuracy and performance, resulting in the optimal armor solution.

Plasan's engineers are unique in terms of their military backgrounds and hands-on experience. As veterans of the Israel Defense Forces they are familiar with soldiers' behavior during combat and

supplier to ministries of defense around the world, Plasan's solutions have been tried and tested by dozens of armed forces in the most demanding battlefields such as Lebanon, Iraq and Afghanistan.

As a global company with locations in Israel, North America and Europe, Plasan is a global market leader. Plasan's production capabilities are complemented by a comprehensive supply chain that encompasses suppliers of materials, equipment and solutions in strategic locations worldwide. This extensive network enables the production capacity flexibility necessary to expand production volumes according to demand.
