

# PM - Partner Manufacturing

## Line of Business

Contract Manufacturer

## Established

1999

## Leading Executives

Mr. Zigi Adler  
Mr. Miki Adler  
Mr. Yaniv Rod

**P**artner Manufacturing is a leading electronics contract manufacturer, providing a wide range of top-notch engineering and manufacturing services for the electronics industry, including full turn-key services, NPI (New Product Introduction) complex electronic assemblies, integration, per-order settings configuration of S/W embedded systems, etc. We deliver turn-key systems for all industry segments, including those that require a particularly high performance level such as the telecommunication and medical sectors.

The company owns and operates an advanced manufacturing infrastructure in two plants at the center and north of Israel.

## PM - Facilities

### Main (Petach-Tikva):

- Company Headquarters.
- Material Management.
- Engineering.
- Production Management.
- Programs Management.
- Post SMT production phases.

### SMT (Rosh-Pina):

- SMT assembly
- Post SMT production phases

## PM Services

- Total Turn-Key solution:
- Customer's NPI escort and support from design to production.
- Material acquisition.
- Design & Manufacturing of Test Setups.
- Engineering support:
  - Production files- Establishment & Maintenance.
  - Value Engineering- Improvement of produceability.
  - Configuration Management.

- Prototypes/Small Quantities Dept.
- Shipping to End Customer & After Sale Support.
- Full RMA process
- One-year guaranty (built to print).

## Manufacturing Technologies

SMT assembly lines

BGA, Micro BGA, Fine Pitch, 0201 capabilities

X-Ray for BGA

AOI - automated optical inspection

- Through hole insertion.
- Electromechanical assembly.
- Cable assemblies.
- S/W Integration, Industrial computing.
- Electrical Tests.
- RF Devices – Testing, Modulation and Calibration.

## RoHS Compliance

### Testing and Repair Capabilities

## Supply Chain/Logistics Management

- Assure prompt material planning.
- Follow up on component obsolescence / EOL.
- Material management per customer.
- Buffer Stock inventory of Critical components or finished goods to shorten Time-To-Order.
- Material Monitoring Control of inventory levels by utilizing ERP system.
- Using the advantages of the sister company A.Y.Electronics & STG.

## Quality Certification

- ISO9001: 2000
- ISO13485 (Medical)
- ISO 14001 Environmental Management system

## Program Management

Customer's focal point of contact at PM:

- Program status.
- Handling of varying customer needs.
- Coordination of manufacturing plan.
- Escalation of critical issues to top management.
- Project referents for Engineering and purchasing activities.
- In charge of periodic reviews on delivery schedule, Inventories, costs, quality issues and Business reviews.
- Insure direct involvement of PM's senior management, from Strategies down to the details in the progress of the project.
