RADOM Aviation Systems Ltd. is an aeronautical design and integration company established in 1988.

RADOM is experienced in performing projects at the aircraft level such as major upgrading of military and civil aircraft including integration of new avionics suits, fighters, trainers, transport aircraft and helicopters.

Special mission aircraft integration (SMA, ISR), with a broad variety of systems is the core business of RADOM.

Fixed wing aircraft and helicopters of both Western and Eastern origin are modified to carry special electronic and electro-optical equipment, while the platform performance is maintained.

Other projects include upgrade and modernization of systems, for aircraft and helicopters of Russian make with western avionics, armament systems and special mission payloads such as the MiG-21 Fighter, the An-26/32 Transport and the MIL MI-8/MI-17 Helicopters.

RADOM has performed - among many other projects - a major avionics and armament upgrade on a PC-9M trainer aircraft for the Slovenian Air Force. The advanced PC-9M training aircraft upgraded by RADOM made its debut at the 1999 Paris Air Show. It is fully operational in the Slovenian Air Force.

RADOM's mission is to provide its customers with the expertise of its employees in the aerospace field in the most cost effective way through the provision of innovative engineering design and advanced manufacturing methodology.

RADOM staff comprises senior engineers with vast experience in the aerospace industry and in the Israel Air Force service.

RADOM successfully applies its competitive technologies and methodologies to military and commercial aviation projects.

RADOM is presenting a successful experience of engineering, design and integration projects.

RADOM is ISO 9001-2000 certified and is a recognized contractor for the Israeli MOD, Defense Ministries around the globe and to leading Israeli and international aerospace companies.

RADOM is able to provide:

- Best Value, Cost Effective Programs.
- Exceptional and Innovative Engineering Solutions.

- Actual State of the Art Systems Integration experience
- Operational understanding for various needs and scenarios
- Fast Response Time and Short Delivery Schedules.
- Competitive, cost effective solutions

Seeking

- Strategic Partners for Major Aircraft Upgrade Projects.
- Participation in Risk - Sharing Projects.
- Sub Contracting / prime contracting in Major Aerospace Programs.
