

Raviv ACS Ltd.

Raviv is a world leading expert developer and assembly supplier for the automotive industry. Over four decades of continued growth, Raviv has steadily increased its capacity as a developer and supplier of small to mid-size mechanical and electro-mechanical assemblies for the automotive industry, meeting challenging market demands with innovative engineering solutions and providing complete end-to-end solutions handling all stages of design, development, production and delivery.

Tailored Assembly and Secondary Operation Solutions

Committed to customer needs, Raviv couples precision injection molding expertise with high-end assembly and secondary operations. Raviv's assemblies are based on automatic made-to-spec assembly machines and testing machines, for a wide range of products, at high efficiency and reasonable prices.

Raviv's Portfolio

Recent Raviv developments include:

- Headlamp washing system:
 - High/low pressure systems
 - Telescopic and static front nozzles
 - High reliability
 - Low fluid consumption
- Windscreen, rear window washing system
 - w/wo heating element
 - w/wo integrated valve
 - Diverse hoses
 - Diverse nozzle types
- Brake booster check valve:
 - One-way valve w/wo electric detection for low vacuum warning
 - Long life leak free
 - Wide temperature range -40°~140°c.
 - Endurance over 1 M cycles
 - Resistance to chemicals and fuels
 - Custom-made design to fit customer requirements
- Rear window actuator
 - Driver controlled electrical operation
 - Partial opening possible
 - Automatic locking when car locks
- Vacuum actuator
- Headrest guide

Quality Excellence

Raviv's advanced quality management system complies with ISO 14001:2004, OHSAS 18000, ISO/TS 16949:2002 and ISO 9001:2008 international standards and ensures excellence at every stage of the manufacturing and delivery cycle.

Customer Service

A chain of warehouses and distribution centers in Europe and the US help maintain uninterrupted supply to the customer. A multilingual team of customer service guarantees on-time delivery and dedicated pre and post sale support. Raviv's marketing and engineering personnel visit clients as often as necessary. All the above ensure that service is not compromised by geographical distance.

Advanced Technology and Service

Raviv delivers fully customized, turnkey design and manufacturing solutions

Raviv provides

- Thorough and professional consultations to determine client needs and cost-effective solutions
- Product development, engineering, and prototyping
- Mold design and construction
- Plastic injection molding components
- Secondary operations, including purchasing services, semi and fully automatic assembly lines
- Product testing
- Guaranteed, on-time delivery
