Quality, precision, innovation and a commitment to customer service place SATEC at the forefront of the energy industry.

SATEC has been a proven solutions-oriented global leader in the research, development and manufacturing of energy management and Power Quality systems since 1987. With two decades of rich experience in the energy management arena, SATEC provides optimal Powerful Solutions for all applications, worldwide. Our greatest strength lies in our extensive field experience and our ability to be flexible in order to find the optimal solution to each problem.

Our products include: digital energy and power meters; power quality measurement instruments in compliance with international standards such as EN50160 and IEEE1159; and advanced energy management systems.

solutions to questions ranging from generic to complex. SATEC's support team is highly involved in the developmental process, to assure a product of the highest quality that is also tailored to the customer's needs.

Solutions

SATEC takes pride in catering to the unique and individual needs of our varied customer base. We provide a wide range of hardware and software products tailored to comply with the various regulations prevalent around the world, and can offer a full spectrum of solutions for all needs, ranging from measurement utilities to high-end applications and communication platforms. SATEC's products are user-oriented and designed for easy installation and operation. As a leader in the field, we at SATEC set the standard by continuously developing and upgrading our products and web-based service, to perfect our clients' energy management and Power Quality systems.

Our comprehensive system is rendered complete by the groundbreaking web application eXpertpower™. This comprehensive, customized, secure system enables users to access energy, power quality and real-time data using a standard Internet browser, allowing full access and control from virtually anywhere.

Certification

SATEC's extensive line of power monitoring equipment and unique software packages adhere to and are backed by international certification to verify their compliance with such standards as ANSI, CE, UL, KEMA and many more. Our quality system is ISO9001:2008 certified.

Customers

We consider product excellence and reliability, attentiveness to detail and an overall concern for quality of service to be central to gaining customer faith and satisfaction. Our customer base is represented by a diverse group of industries, including petroleum, telecommunications, banking companies, communications companies, military and governmental authorities and many major power utilities.

SATEC exports to over 40 countries worldwide throughout Europe, North and South America, Africa, Asia and Oceania. Our worldwide distribution network provides local marketing service and prompt professional support. Our team of scientists and industry experts are available to dispense expert technical support, and provide technical
