## Line of Business

- Military Support & Transport Systems
- Command Shelters
- Commercial Transport Systems
- Lifting & Handling Solutions
- Engineering & Metal Works

## Established

1971

## Leading Executives

Arie Fridenson, Chairman  
Alon Fridenson, CEO  
Shmuel Nir, VP Marketing  
Alex Frimer, COO  
Menashe Zur, Chief Engineer

**S**hladot Ltd. designs, engineers, manufactures and integrates comprehensive mobilized transport solutions and support systems and other large-scale metal work projects for diverse commercial and defense-related deployments. Across its diverse activities base, Shladot strives to empower its customers with added value by providing turnkey project management. The lifecycle of a Shladot-led project typically extends to superior engineering and design, flawless standards-compliant manufacturing and assembly, seamless integration and interoperability of all onboard electronic and computerized support systems, and follow up technical support.

## Military Support & Transport Systems

Shladot addresses a wide variety of mobile transport and support infrastructure challenges for military and civil defense implementations, including: trailers, truck bodies and fully outfitted vehicles; APC's; heavy equipment transporters and tankers;

wide range of mobilized deployments. From standard models (S-280, S-749, ISO shelters, etc.) to custom designed models, we provide a full turnkey solution fine-tuned to exacting client specifications, including outfitting and deployment of the shelter on a vehicle (truck, trailer, HMMWV etc.); integration of all onboard electronic support systems and infrastructure; and full customization services according to order.

## Engineering & Metal Works

We take the planning and execution of comprehensive, multi-disciplinary metal work projects to exhaustive levels of professionalism, seamlessly synergizing between our various teams in realizing their delivery. Our knowledge base in mechanical and electrical engineering, systems integration and interoperability and hydraulics is broad and applicable in a wide variety of deployments, enabling us to provide customized metalwork solutions for different industries.
