

Sysmop Technologies Ltd.

Line of Business

Embedded Systems
Development
Mechanical, Hardware
and Software Development

Established

1999

Leading Executive

Mr. David Arlinsky
CEO

Sysmop Technologies Ltd. is a dynamic and innovative research and development company that was established in 1999. The company employs engineers that utilizes the latest technologies.

We focus on :

- Embedded Systems
- Hardware engineering
- Mechanical engineering
- Software engineering

Sysmop Technologies functions as an outsourcing R&D team that provides cost effective solutions for development projects.

Sysmop Technologies employs hardware, software and mechanical professionals who are dedicated to provide innovative and productive solutions for our customers.

Sysmop Technologies experienced engineering teams handle a complete project, from initial concept through the design and prototype phases of requirements, design documents, and implementation, all the way to the final product delivery.

Sysmop Technologies delivers the best design to cost solution for its customers. Based on Sysmop Technologies engineers long term experience Sysmop Technologies engineers will provide customers complete manufacturing costs from the first step of the project and redirect the product development to customer needs and budget while ensuring cost-effective and optimum solutions.

Sysmop Technologies development stands in all regulations including FDA, CE, Automotive regulations and more. Sysmop has ISO 9001:2008 certification.

Sysmop Technologies experienced engineering teams handle a complete project development and prototype manufacturing tasks:

- Initial concept and requirements definitions
- System, Hardware, Software and Mechanical Design
- Implementation –
 - Board design, editing and manufacturing
 - Software coding
 - Product mechanical and packaging design
- Verification tests
- Validation and environmental tests
- EMC, CE, UL tests preparations and support.
- Small factor and prototypes manufacturing

Our projects are for a variety of industries including:

- Medical devices
- Automotive
- Industrial Automation
- Consumer electronics
- Marine
- Security
- Military.
