The TADIR-GAN GROUP incorporates 4 subsidiary companies in 4 different locations: Tadir-Gan (Israel), Ortal (Israel), Tadir-Gan Avrupa (Turkey) and Ortal Döküm (Turkey). Each manufacturing plant has its own foundry for casting Aluminum, Magnesium or Zinc using High Pressure Die Casting Technology (HPDC). Tadir-Gan (Precision Products) 1990 Ltd. manufactures Aluminum components, specializing in high precision parts with emphasis on turnkey projects for full assemblies.

Tadir-Gan in 2007 and within 2 more years (2009) Tadir-Gan Avrupa and Ortal Döküm were established in Turkey.

Other Important Information

Tadir-Gan has been awarded the title "Supplier of the Year" by GM (2001-2002) and has attained Q1 status at Ford (2007).

Ortal was awarded the title of 'Best supplier for ZF Group' (2004) and twice the 'IMA Award of Excellence' (2008 and 2009)

Ortal brings over three decades of experience to its specialized field of manufacturing Magnesium and Zinc die-cast sub-assemblies and parts for the automotive industry.

The TADIR-GAN GROUP as a whole has the ability to offer the entire die-casting process in-house from start to finish, and deliver total die-casting solutions in 3 different alloys.

The TADIR-GAN GROUP utilizes its extensive knowledge and highly experienced workforce to provide both mass production and customized parts on Hot & Cold die casting machines from 20 to 1800 tons as well as a wide machining range of CNC centers, assembly lines and transfer lines.

Main Markets: Automotive industry, Electrical cabinets, Hardware and Telecommunication.

Employees: A total workforce of 450 employees.

Leading Customers

The TADIR-GAN GROUP customer list encompasses some of the world's leading automotive manufacturers, including: General Motors/Opel, Peugeot-Citroen, Porsche, MAN Nutzfahrzeuge, Audi, VW, ZF Nacam Lenksysteme.

The TADIR-GAN GROUP has representatives in the US, the UK, Sweden, Spain, France, Germany, Hungary, Italy and Turkey.

Production Capacity

- Aluminum 5500 Ton p/a
- Magnesium 1500Ton p/a
- Zinc

Range of Machines

- Aluminum: 380 Ton – 1800 Ton
- Magnesium: 200 Ton – 1400 Ton
- Zinc: 20 Ton – 200 Ton

Quality Control

Both plants are ISO/TS 16949:2009, ISO 9001:2008 and ISO 14001:2004 certified. A support network is locally available to our customers worldwide.
