TOSAF is an industrial group that manufactures compounds, additives and color masterbatches for the plastics industry with a wide range of raw materials.

Brief History

TOSAF was founded in 1985 and has achieved a considerable and steady growth since. Tosaf operations are based in 11 production sites: in Holand, Germany, UK, Ukraine, Turkey and Israel. TOSAF holds a leading position in the plastics industry and constantly increases its presence in world markets.

This is performed by establishing new plants and acquiring existing operations.

Finance

TOSAF is a private company. The main shareholders are the Megides holding and the Ravago group.

The expected turnover of the group in 2010 is 200 million Euros.

No. of employees: 720

Marketing

Tosaf's customers are plastics converters and manufacturers. Marketing is performed by a full distribution system, including warehouses in different areas, and backed-up by technical support. A network of sales offices, distributors and agents operates to serve customers in the different markets.

R&D

To provide best product solutions to its customers Tosaf have a skilled staff of creative and experienced people, engaged in the development of new and original solutions, geared to customer objectives. Laboratories contain sophisticated equipment and machinery and are also capable of performing simulations of most of the production processes.

Product Range Includes

Additive masterbatches for a wide range of applications and polymers such as:

- BOPP
- Agricultural & Industrial films
- Polycarbonate sheets
- Pipes
- XPS
- Raffia
- Flame retardants
- UV/Light stabilizers.
- Special additives
- Color masterbatches: A wide range of colors and special effects

Compounds

- Mineral filled compounds for the white goods industry, automotive and other plastic industries
- Polyolefins: mineral-filled, glass-fiber reinforced, colored.

Products are tailor-made to customer requirements.

Production

The company has a total annual production capacity of 140,000 tons, achieved by using modern, sophisticated and versatile equipment. The production lines provide a variety of features and capacities (from 1 to 3,000 kg/h), affording Tosaf greater flexibility in the simultaneous production of various materials with different properties and applications. The machine mix is designed to provide highest service performance to the market.
