

U.S.R. Electronic Systems (1987) Ltd.

Line of business

Design, Manufacturing and Assembly of Electronic Boards, Products and Systems.

US.R. Electronics (USR) started its activities in 1984 and has rapidly become one of the leaders in the EMS market – Electronic Manufacturing Services. The company provides outsourcing services and Turn Key solutions to companies in high-tech communications and the video, safety, security, medical, defense, industrial, cosmetics and the solar sectors in Israel and worldwide.

USR, which is privately owned, has more than 700 skilled employees including the finest engineers, technicians and additional professionals.

purchase of components and raw materials, assembly, engineering and production of electronics products from initial design through to supply of the finished products and repair services after the warranty period.

Engineering

As one of the country's leading electronic manufacturers, USR has the flexibility to manage every project from its initial stages to NPI with engineering support throughout the product's life including DFMA implementation in the batch's development stage with the unique VALOR's software. Its includes Components Engineering, Process Engineering and Products Engineering using PDM AGILE systems. vCheck – using this tool from Valor's software for shop floor control in real time.

Certifications

USR has ISO 9001:2008, ISO 14001:2004, ISO 18001: OHSAS, ISO 13485:2003 and AS9100:2009(Under process). USR is empowered to authorize employees according to IPC-A-610, which meets ROHS standards. The 5S method implemented as an organizational cultural perception.

Global Activities

To expand its capabilities and be closer to Far East suppliers, USR has set up an excellent team for mechanical and electronic outsourcing in Shenzhen, Southern China. This source is approved and supervised by an experienced local team and Israeli management, who directly handle customer supply in Israel, Europe, USA and Asia. A support center operates in Hong Kong, providing services to customers and suppliers in the Far East through purchase, logistics and finance departments.

Customers

USR's consistent ability to read the market and adapt itself to customer demands combined with high reliability and strong economic backing has enabled the company to build a very broad base of satisfied customers, with long term loyalty including: GE Healthcare, Radware, GE Healthcare Austria, Intel, GE Norway, NDS, Compulab, Verint, Syneron, Rad Data Communications, Corrigent (Orckit), IAI, Sanrad, Oridion, Dmatek, Dai Telecom (Telit), Radwin, BrightSource, and others.

In The Frontage Of Technology

The company's motto "Creating Continues Technological Differentiation" reflects USR's high capabilities from initial design and the prototype phase through to precision supply to the end customer – making it the ideal partner for any EMS project. Production lines are operated on strict short run designs with great flexibility in line management to create responses to special requirements, large-scale manufacturing capabilities and small-volume special options for start-ups.

Turn Key Solutions

USR leverages its core capabilities and its major experience over the years to provide impressive Turn Key EMS solutions. These solutions include
