and Investigative Solutions

Verint® Systems Inc. (NASDAQ: VRNT) is a global leader in Actionable Intelligence® solutions and value-added services. More than 10,000 organizations in over 150 countries use our workforce optimization and security intelligence solutions to improve enterprise performance and make the world a safer place. Headquartered in Melville, New York, Government and commercial organizations worldwide recognize Verint for innovation, long-term business value, and outstanding return on investment.

Verint Communications Intelligence and Investigative Solutions

Verint Communications Intelligence and Investigative Solutions™ access voice and data from virtually any wired, wireless, or broadband communication network, using sophisticated probes, filters, and analytics to rapidly detect important information and activity and help build evidence. Built on Verint expertise deploying in-

other regional and country-specific lawful interception regulations and standards.

Law Enforcement Agencies

Law Enforcement Agencies are required to efficiently generate Actionable Intelligence from vast amounts of communications and operate more productively and efficiently as the volume of communications grows.

Intelligence and National Security Agencies

Verint provides national security agencies, military SIGINT units, and other intelligence organizations with solutions for target and mass interception, filtering, analysis, and investigation of voice and data.

Solutions

- **Communications Interception** - Lawful and mass interception solutions for intercepting, monitoring, and analyzing information across a wide range of communications networks
- **Communications Service Provider Compliance** - Solutions for the collection and delivery of call-related information to government agencies in compliance with legal standards and regulations
- **Mobile Location Tracking** - Real-time mobile network device location tracking, with advanced geospatial analytics and workflow to support investigative activities
- **Fusion and Investigation Management** - Fusion of data gathered from multiple database sources with link analysis, adaptable investigative workflow, and analytics to improve investigation efficiency and productivity of investigations. Supports a wide range of complex investigations, including financial crimes
- **Web Intelligence** - Secure, covert collection and analysis of large volumes of Internet content including dedicated social network analysis tools
- **Tactical Communications Intelligence** - Portable communications interception and location tracking capabilities for tactical field operations
