

## Xi Information Processing Systems Ltd. (Xi)

### Line of Business

Location Based C4I,  
Command & Control

### Established

1968

### Leading Executive

N. Igal Levy  
CEO

**X**i is a privately owned company established in 1968. Xi develops geo-referenced command and control systems for defense, homeland security and commercial applications. Xi products developed for defense applications particularly for UAV's (Unmanned Aerial Vehicles) and RADAR's were deployed by numerous defense forces including the US Navy, and are field and battle proven.

Xi offers a family of Location Based products and solutions for mobile and security applications; real time command and control, management, tracking and monitoring, guiding and navigation.

**Nav X info™** – Hybrid navigation system for off-street and on-street navigation on hand held PND's, tablets and desktop computers.

**Mobile Tolling** - Mobile Payment management and collection system for urban parking, congestion and road tolling.

In addition to its standard products Xi offers customized systems in its fields of expertise; Telematics, Time Critical GIS for real time applications, Location Based Command and Control, vehicle tracking and monitoring, fleet management, mobile information, navigation and mobile payments/tolling systems.
