

Yail Noa Group

Line of Business

Technical supplies for the Defense, Aviation, Pharmaceutical, Automotive, Electronics & High Tech Industries

Leading Executives

Oren Goor – CEO
Eitan Keinan – CEO, Yail Noa 1995 Ltd

Yail Noa is one of Israel's leading industrial companies. The group, which has been established in 1972, provides its customers in Israel and abroad with a wide variety of technical products and solutions.

Yail Noa is a recognized leader in the field of producing, developing, marketing and distributing of technical supply for the following industries: Defense, Aviation, Electronics & High Tech, Pharmaceutical & Automotive.

Yail Noa 1995 LTD - Metal Works Profile

Since its establishment over 45 years, Yail Noa gained its reputation as a leading manufacturer of assemblies and sub-assemblies, mechanical systems and components, mainly for Armored Vehicles for the including, MBTs, APCs for the IDF and other customers.

Yail Noa integrates development engineering capabilities, along with production engineering and high manufacturing technical skills.

Yail Noa employs engineers, technicians, and professional workers, in production, quality assurance and marketing, who masters state of the art manufacturing technologies, including:

CNC and conventional milling and lathing, CO₂, Argon, T.I.G and M.I.G welding of Armor steel, Aluminum and St.St, Assembling dept and metal treatments and painting.

K&K Business Unit Profile

K&K specializes in development and production of innovative high technology fabrics & textile solutions. K&K's primary fields of expertise are ESD textile solutions, antistatic fabrics and ESD garment collection for use in Electrostatic Protected Areas (EPA).

All K&K's antistatic fabrics & garments comply with IEC 61340-5-1 and ESDSTM2.1-1997 standards. K&K is currently developing an ESD garment collection that will comply with EN1149 standard as well.

Apart of ESD products, K&K also offers:

EMI/RFI Textiles

- Electro Magnetic Fields (EMF) radiation protection materials.
- "Shieldon" fabric - reduces radiation by 50%-99% at frequencies between 10 MHZ-5 GHZ.

Cleanroom Textiles

- Cleanroom antistatic fabrics, garments and unique custom made textile solutions for cleanroom class 1000-100,000 (ISO 5-7).

Fire Resistant Textiles

- "Fireon"/"Inferno" - heat resisting fabrics withstanding temperatures up to 1200°C.
- Fire retardant/ESD fire retardant fabrics and garments.
- "Metalloid" - High-Silica fiber materials and fabrics providing heat resistance, fire retardation and sound insulation.
