

Admir Technologies

Line of Business

Geotechnical Solutions
in Civil Engineering

Established

1991

Leading Executives

Mr. Amir Auerbach

Mr. Meir Taito

Ing. Dan Ovadia

Admir Technologies offers geotechnical solutions for a broad variety of civil engineering applications.

Admir represents the leading local and overseas manufacturers and provides the technical support needed to perform reliable and secure civil engineering projects.

Products

Admir Technologies introduces a wide range of products that provide solutions for various applications such as:

- Soil improvement
- Separation and reinforcement of roads and railways
- Loads support
- Reinforcement of asphalt structure

• **Admir Environment** - which markets solutions for sludge dewatering, cleaning of water reservoirs, industrial tanks cleaning and treatment of fuel sludge.

• **Admir Russia** - markets solutions for sludge treatment in the CIS.

• **Admir Africa** - markets geotechnical solutions for civil engineering projects in African countries such as Ghana, Ethiopia, Zambia and Uganda.

Admir's engineering know how and the proven successful experience gained in hundreds of projects enable Admir to offer solutions for various engineering applications, while taking into account cost/benefit ratios.

Lining of Ma'ayan Tzvi water reservoirs - Israel

Reinforcement of asphalt structure - Ghana
