

Aeronautics Ltd.

Lines of Business

Unmanned Aerial Systems
AISR
Ground Systems
C4I
ISTAR Solutions

Established

1997

Aeronautics Ltd. is a leading manufacturer of defense solutions based on unmanned aerial vehicles, and advanced ISTAR systems. Aeronautics products represent vast operational experience backed by continuous development in all areas of activity.

Capabilities

Aeronautics offers in-house vertical integration capabilities, which, together with advanced engineering, open architecture, and flexible modular components, offer high-growth potential for platforms and systems. We utilize all the technologies necessary for secure, safe, and cost-effective production and operation. We keep up with technical advances, and offer innovative design and specialized solutions tailored to specific needs of each client.

Aeronautics comprehensive defense solutions include a range of services such as security and project management, high-level training, and maintenance services.

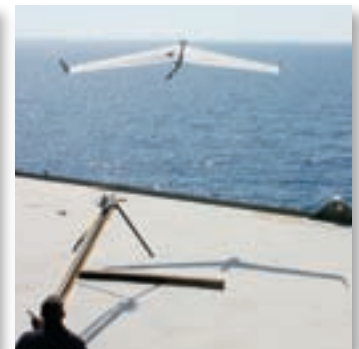

Subsidiaries

Aeronautics subsidiaries provide a unique synergy of capabilities, contributing to the technological excellence of the products, independence, flexibility, reduced time-to-market, and cost-effectiveness. The subsidiaries and their technology fields include:

- **Commtact:** RF digital datalinks in a wide spectrum of frequency bands (100% ownership)
- **Controp Precision Systems:** High-performance electro-optical day and night stabilized observation payloads and precision motion control systems (50% ownership)
- **R.T LTA systems:** Aerostats (tethered balloons) and mooring systems for ISR, radar, SIGINT and GSM tactical communications (51% ownership)
- **Z.T. SRL ("Zanzottera,")** indirect and direct fuel injection engines, specifically designed for unmanned systems. (100% ownership)

Services, Training and Support

Aeronautics competitive edge is most evident in its

Core Business

- **UAS:** Orbiter 2 Mini UAS, Orbiter 3 Small Tactical UAS, Aerostar Tactical UAS, Dominator MALE UAS
- **Aerostats:** Skystar 180 and 300
- **C4I:** integration solutions
- **Communications:** Airborne and ground data links, including analog and digital, and communication relay

Fields of Activity

- Defense
- HLS
- AISR
- Civilian and commercial

operational expertise that complements its technological dynamism, and its commitment to clients. Experienced product and project managers recommend technologies and equipment to suit specific requirements and needs, and advise how the solutions should best be applied.

In cooperation with our subsidiaries, representative offices, agents and dedicated service stations, we provide efficient and reliable services to clients worldwide.

To support its Customers and to guarantee smooth UAS operations, the Aeronautics Unmanned Systems Academy provides high quality and in-depth training programs, including certification and OJT (On Job Training) for UAS Mission Commanders, Operators, and Technicians.
