AFCON Control & Automation Ltd. (AFCON) is a subsidiary of the AFCON Holdings Group, an Israeli leading provider of infrastructure solutions. The AFCON Holdings Group comprises many fully integrated companies, consolidated under four divisions. Registered on the Tel Aviv Stock exchange with more than 1250 employees, AFCON stands among the leading and significant industrial conglomerates in Israel and abroad.

General Experience and Expertise

AFCON Control & Automation, Israel's major Systems House and solutions provider, is organized into 3 business units:

- Control & Building Management
- Fire & Safety
- Security & Parking

Over 300 skilled employees of qualified engineers and technicians, design and engineer the variety of multidisciplinary projects. AFCON has been involved as such with almost all of Israel's major projects throughout the governmental, industrial and commercial sectors. AFCON can harness diverse services for the execution of large-scale projects in Israel and abroad.

Multidisciplinary Solutions

AFCON is structured as a system house responsible for all project aspects from sales of hardware or software to the complete management of turnkey solutions. AFCON solutions are multidisciplinary covering security, communication infrastructure, building management, fire and safety and software management systems. The combination of all of these services enables AFCON to provide comprehensive integrated solutions including all disciplines. Together with other companies in the group, AFCON can provide complete turnkey solutions including civil and Electromechanical works.

Unique Operator Interface

Moreover, AFCON's solutions are integrated into a unified single Command and Control Center based on the PULSE software package. The C&C software being an in-house product has enabled AFCON to provide uniquely integrated solutions for the wide spectrum of applications, covering Safe City, Security, fire & safety, building management and HVAC into one single user interface.

Multi-Systems

Managed by a control and command center over IP, these systems include:

- Unified Command & Control center
- Access Control systems
- Biometric Recognition Systems
- Peripheral Protection Systems
- Electronic Fencing Systems
- CCTV and Digital Recording Systems
- License Plate & RFID AVI Systems
- Alarm and Intrusion Systems
- Metal Detection Gates
- Parking Management Systems
- Fire Detection and Extinguishing
- Public Address Systems
- Building Management Systems

Special Skills & Technologies

On top of acting as a leading system integrator AFCON develops the following technologies:

- PULSE command and Control Software
- Off-street parking systems
- Electronic Fencing Systems
- Vehicle access control Software for critical facilities and gated communities
- Sea Port gate management software - as management software that integrates LPR, OCR for trucks and containers, driver biometrics, video monitoring, all integrated with the Port TOS software.

Our customers

For the buildings sector, AFCON serves customers such as Airports, Seaports, Railways, governmental facilities and military bases, critical facilities, High-tech campuses, hospitals and universities and industrial facilities.

For the industrial sector AFCON provides automation and process control solutions for Power Stations, Cement Plants, Minerals, Oil & Gas and Chemical industries.
