For International Customers

AFCON offers the following services:

- Local content for industrial projects such as combined cycle and PV power stations and other industries
 - Complete offering of all Electromechanical systems including full range of voltages for public buildings such as hotels & malls
 - Technological products for worldwide distribution
- AFCON operates as EPC, General Contractor, sub-contractor, or JV depending on project details.

Infrastructure Division

Provides services that include:

- Civil Construction
- Electrical Contracting
- HVAC/R
- Sanitary Installations
- MV/LV Panels Manufacturing
- Natural Gas Technologies

The International department of this division has procured complete turnkey projects in Romania, Russia, Czech Republic and Germany in the market segment of Malls and Hotels.

Panel Manufacturing

AFCON has a 30,000 sq ft facility for the production of electrical panels based on ABB switchgear technology, or any tailored customer requirements. The plant specializes in making MV panels for AIS and GIS disconnectors, for ratings up to 36KV and 4000 amps. The plant also produces panels mounted inside portable containers. Other products include MCC and Control Panels.

All products are certified with European standards and can be shipped worldwide.

Control & Automation Division

The division provides solutions and turnkey projects for all low voltage systems including: Automation, Building Management, Security, Parking and Fire & Safety. Together with the Electromechanical division, AFCON provides complete projects such as the Cotroceni Mall in Bucharest, and AFI Mall in Russia.

Communication Division

Tadiran Telecom is the manufacturer of the innovative software based Unified Collaboration & Communication (UC&C) systems to handle all enterprise communications for up to 25000 users.

Technological Products

AFCON designs and manufactures a variety of products for distribution worldwide. These include:

- HMI/SCADA PULSE Software
- Off Street Parking Systems
- Electronic Fencing Systems
- MV/LV Panels
- UC&C Systems
