Related Business

Agam Metal Group

Metal & Industrial Equipment & Metal sheet processing: www.agam.co.il

- R&D applications in developing new types of transportation solutions.
- Using the best steel, and composite materials in the market.

In 2012, Agam entered Israel's CNG (Compressed Natural Gas) market – with new leading solutions for transporting NG (Natural Gas) by road.

Agam has become a major player in providing gas storage solutions to the Israeli market and neighboring countries.

Agam has developed the first "Testing facility" for CNG Cylinders in Israel.

The company plans to provide a wide range of services to develop the CNG market, and other markets such as the medical and chemical markets in Israel. Agam is also partnering with leading global energy companies.

Today Agam's position in the renewable energy development market is getting stronger and the company is involved in future projects in different sectors of Israeli industry.
